

WELCOME VISITORS

PLEASE READ BEFORE ENTERING

COVID-19 and Flu Precautions as of 3/11/20 5:30 pm

To keep our residents and staff safe, please observe the following:

- Please do not enter the building if you have any symptoms of respiratory illness: cough, fever, sore throat, runny nose, and/or shortness of breath. Please stay home if you are sick.
- All visitors must sign in at the front desk. Anyone with symptoms of illness will be asked to leave.
- We are limiting visitors ONLY to adult immediate family members at this time. Please inform extended family and friends.
- All visitors must go directly to and remain in the resident room. No walking in the corridors, visiting in dining rooms, or sitting in common spaces.
- Cover coughs & sneezes with your sleeve or tissue.
- Wash your hands often. Use the hand sanitizers we have mounted on walls throughout the building.
- We are asking residents to postpone all non-essential appointments or gatherings outside the Home.
- We have cancelled all Activities trips out to the community.
- We have suspended all tours of the nursing home and rehab floors.
- If you have travelled internationally, to a domestic hot spot, or have been caring for a sick family member, see your community doctor for written clearance before visiting.
- To limit unnecessary exposure to large groups, we will be working on a case-by-case basis to reschedule some planned activities and will incorporate creative activities solutions whenever possible.
- If you would like to Skype or FaceTime with your immediate family member, please contact the Activities Department at ext 192 to make arrangements.
- We are increasing our admissions screening procedures to assess respiratory symptoms prior to a new resident entering the facility.
- If you have not had a flu shot, wear a mask while visiting.
